QB2-XL

ISO/PAS 12835:2013 Verified
Thermal Premium Connection
for Large Diameter Casing

The EVRlock QB2 has set the standard in performance for thermal well intermediate casing. However, large diameter casing in shallow wells has provided a new set of challenges that traditional thermal premium connections have struggled to meet. As a result, EVRAZ has developed the QB2-XL (eXtreme Line), an ISO/PAS 12835:2013 (TWCCEP) tested connection with unparalleled performance in 10 3/4" OD and larger casing

- Gas tight sealing in compression and tension when using the QB2-50m thread compound
- Verified by ISO/PAS 12835:2013 testing at an ASL of 290 (additional supplementary testing at 350°C)
- Greater than pipe body efficiency in multi-axial loading
